<sup>\*3.</sup> These models can be used as Light-ON when the L terminal and positive (+) terminal are connected to each other. To use them as Dark-ON, do not connect these terminals to each other. When used at light-ON, it is useful to select the connector EE-1001-1. The L terminal and positive (+) terminal of this connector are short-circuited in advance.

<sup>\*2.</sup> Only for Pre-wired Models.

## **Safety Precautions**

#### Refer to Warranty and Limitations of Liability.

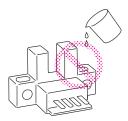

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

#### **Precautions for Safe Use**

#### Operating Environment

These Photomicrosensors have an IP50 (conforms to IEC60529) enclosure and do not have a water-proof or dust-proof structure. Therefore, do not use them in applications in which the sensor will be subjected to splashes from water, oil, or any other liquid. Liquid entering the Sensor may result in malfunction.

#### **Precautions for Correct Use**

Make sure that this product is used within the rated ambient environment conditions.

#### Installation

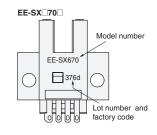

When direct soldering to the terminals, use the following guidelines.
 Soldering Conditions

| Item           | Temper-<br>ature | Permissible time | Remarks  |
|----------------|------------------|------------------|--|
| Soldering iron | 350°C<br>max.    | 3 s<br>max.      | The portion between the base of the terminals and the position 1.5 mm from the terminal base must not be soldered. |

 The terminal base uses a polycarbonate resin, which could be deformed by excessive soldering heat, resulting in damage to the product's functionality.

#### Lot Numbers and Models

In the right illustration, 376d indicates the lot number and factory where the product was manufactured. Do not include this code with the model number when ordering.
